Rev. Dr. Pusey says that London is, in sail sprobability, one of the largest heathen cities in the world, and that many of its inhabitants will be judged, he supposes, by the same law as the heathen in China and Japan.

The oldest house in the United States is supposed to be at Pembroke, Mass. In 1662 Peleg Barke's ancestors built a fort of stone and mortar as a defeuse against the Indians, and it has been used as a dining-room for years. The main building is only ten years younger.

building is only ten years younger.

Last Spring, J. N. Marden, of Baltimore, Md., tried the experiment of keeping the frost away from 2,500 of his pear trees by building fires around them on severe nights. His orchard contains 15,000 trees, and those treated as above described yielded fruit that sold for more than \$6,000, while the balance of the orchard produced comparatively little.

Prof. O. S. Fowler, the great phrenologist, states that bile in the stomach is is dissoluble in water just as hot as it is dissoluble in water just as not as it can be swallowed. A pint and a half of hot water sipped slowly, say for three quarters to an hour and a half, after which the patient is to go to hed and cover up warm, will cure billiousness; repeat a few times if necessary. The billious fever and chills are cared in this war has the addition of a clath diped way, by the addition of a cloth dipped in hot water and laid on the stomach; the patient to get into bed, cover up well and stay there.

Among the many cases of old men who voted for Garfield, Mr. Isaac Farewall, of Dorset, Vt., is perhaps the most remarkable. He was born July 11, 1779, on the farm where he has always lived. He voted for Garfield and Arthur, and has voted for President at twenty-one successive elections. His first vote was in 1800. Fifteen times he has voted for the men who were elected. In 1828, 1832, 1836, 1841, 1852 and 1856 his vote did not help make the President, but in each of those years the voice of Vermont was in accordance with his vote.

How many husbands are there who How many husbands are there who can appreciate this story? A darkey recently made application for a divorce from his wife. When asked on what grounds he asked for a divorce, he explained as follows: "De ground of disoccasion is sufficient enough. When I rented ten acres and worked one mule I narried a woman suitable for de occasion. Now I rent sixty acres of land an' work five mules. My fust wife is a mighty good ten-acre wife, but she don't suit de occasion ob sixty acres. I needs a woman who can spread more."

Sr. Pach, November 16.—The number of lives lost by burning and freeza confident expectation on the part of ing in the Insane Asylum are variously estimated at from twenty to fifty. Loss on building, \$300,000. A special dated at 4 a. m. says the scene of the burning of the south wing of the hospital was heartrendering in the extreme. So appalling a sight has rarely been witnessed, and I trust may never be again. Many of the patients refused to leave the building. They ran up and down the halls, streaming and crying, and acting like Bedlamites. There were, of course, those who could not be enaxed or forced out of the building and became unhappy victims of the flames and suffered a horrible death in the pit of flames. Others saved some by ladders and some escaped by leaping from the windows. Some were nearly nude, some shoeless and hatless and all were exposed to the exceeding cold of the creasing through the active tailers of night. Seventeen city teachers were present at the regular meeting last buturd w. J. A. Wilkinson discussed dictionary work, giving many valuable suggestions in connection with a short practical drill on liquida, cognates and vowel consonants. The pronuncration of the, to, and a were alluded to in a practical manner by Mr Gastman and others M: (, then read an article advocating the topical plan of recitation Swearingen a "wooden wedding' surprise and of examinations Mr Henderson had a special class in Natural Philosophy at this meeting. Mr. H. never fuls to interest his heaters when science is in the topic. Mr Gastman conducted a general recitation from Spencer's writings, life, etc. After careful consideration, we are of the opinion that these special topics must be prolific of much good to the teachers and pupils of the city schools Supt. THE JUMPING GRASSHOPPER. A good story is told of John Mackay, the mining millionaire of California. He has in his employ at Carson City, Nevada, an expert named Maurice Hor-Newada, an expert named manuteer rivership, a German who is elernally wishing to make bets on everything transpiring in the country. This annoys Mackay, and on one occasion saw an opportunity to teach his subordinate a lesson. One day Hoeflich was playing with an enormous grasshoper. It could jump over
